

PATIENT INFORMATION FOR RADIATION THERAPY OF THE CHEST

SUPPORTING YOU DURING TREATMENT

You will be reviewed regularly during your treatment by your Team. Please report any concerns to the Triage Nurse or to the Radiation Therapists on your treatment unit prior to having your treatment.

We are here to support you whilst you undergo radiation therapy. If you have medical conditions that are not cancer related please continue to seek advice from your general practitioner.

If at any time you feel you are very unwell, you should not wait until your next radiation therapy appointment. Please go to your nearest emergency department.

MANAGING SIDE EFFECTS

Radiation therapy side effects vary from person to person. The following are some common side effects.

PAIN, HEARTBURN OR DIFFICULTY SWALLOWING

- This may occur if the oesophagus is in the treatment area.

- It is important to maintain your weight and fluid intake during treatment.
- If you notice any weight loss and / or difficulty eating or drinking, please inform the Triage Nurse.
- Avoid irritants such as cigarettes or alcohol.
- You will be seen by a dietitian early in your treatment.

NAUSEA & VOMITING

This treatment may cause nausea (feeling sick) and vomiting.

- If you feel sick please let the Triage Nurse know.
- If necessary you will be seen by a dietitian early in your treatment.

SKIN REACTION

- During radiation therapy the skin in the treatment area may become red and sore. It is important not to use anything on your skin which may cause irritation. Use only the products advised by the staff.
- Hair loss may occur in the treatment area.

Please follow these guidelines:

Do:

- Use mild, unscented, non-alcohol based soap.
- Use warm water, rinse and pat dry with a soft towel.
- Use a moisturiser, like sorbolene with 10% glycerine, which does not contain perfumes or additives and is a thin lotion not a thick cream.
- Avoid sun exposure to the treatment area.
- Wear loose, comfortable clothing.

Do not:

- Use any tape or bandaids on the treatment area.
- Rub, scrub or scratch the skin in the treatment area.
- Use any creams, lotions, powders etc. unless recommended by your treatment team.
- Use hot packs, hot water bottles, hot water, cold packs or ice packs on the treatment area.

TIREDFNESS

It is not unusual to feel tired while you are having treatment.

- Rest if necessary.
- See the Triage Nurse for more information.

AFTER TREATMENT INSTRUCTIONS

After you have completed your radiation therapy it is important to remember to manage your symptoms until they have subsided.

- The skin reaction may become worse after treatment has finished. Continue your skin care regime until the skin heals.
- Always keep the treated area out of direct sunlight.
- Continue to avoid alcohol and smoking as heartburn may continue 2-3 weeks after treatment is completed.

WHAT WILL HAPPEN AFTER RADIATION THERAPY?

At your last 'On Treatment Review' appointment, your doctor will decide on the appropriate follow-up care.
